Modern Landscaping

EVERGREENS FOR YEAR ROUND COLOR

Evergreens give a gracious and dignified appearance to the home ground, which can not otherwise be produced. They blend delightfully with the landscape in summer. About foundations and at entrances they afford a pleasing effect in color and form variation.

Every evergreen has its place and after it is planted should be kept sheared or pruned so as to keep it uniform and not allowed to grow too large. With proper shearing an evergreen can be kept at a uniform size for years. This work should be done by experienced men and at the proper season. This also holds true of deciduous shrubs. In order to keep the foliage on all evergreens and shrubs a nice deep green, application of fertilizer should be given. Evergreens also should be kept well watered for the first two or three years, and like other plants they need spraying to keep in check scale or any other insects that might attack them. Certain sprays should be used on evergreens.

Consult our Landscape Department. We are always at your service.

Pansies have always been a great specialty with us and we are justly proud of the quality and trueness to type of our strains. Pansies succeed best in rich, well-drained soil in a sunny position, and produce their finest flowers in the cool, early days of spring. Keep flowers picked during the summer, plants pinched back, and you will get a nice lot of flowers again in the fall. For earliest blooms, seed indoors. Buy our hardy plants. 50c dozen.

ORNAMENTAL VINES

For Shade and Beauty

A home planting is seldom complete without a few vines to lend added charm and grace not to be obtained from other sources. Vines furnish shade to the porch, the pergola, garden arbor, children's playhouse, and are often employed for temporary shade over windows. When vines are planted near foundations the soil should be replaced with rich garden soil to obtain best results.

ROSES, Select Garden Favorites

Probably no other class of ornamentals give as much value as do roses. Often the first season's bloom more than repays for the time and money expended. The following list includes the best kinds recommended by the rose specialists of the country. In planting, select a protected location and dig soil deeply, giving good drainage. Roses are heavy feeders, hence they should have rich soil. Well rotted manure or bone meal are good to use. Be sure to pack the soil down tight about the roots in planting. Everbloomingers may be set 18 inches apart, Hybrid Perpetuals 2 feet apart. Protect roses over winter by either mounding up each plant with soil or by covering the beds at least 6 inches with leaves or straw manure, binding the top with branches or stalks. Our roses are all 2-year stock, field grown, that will bloom the first season.

Milot-Mills everblooming rosebushes are sure to grow because we start them for you, thus assuring no loss at planting time. We list only the best for our climate, which are also the leading varieties. Plant Milot-Mills Roses and you cut roses right away.

ORNAMENTAL TREES
For Shade and Beauty

Trees serve to beautify the landscape by framing the picture and directing the eye to the house and points of interest. They also provide the very necessary background against which the house stands out. They should never be planted without well considered purpose. When carefully placed their play of shadow on the lawn, across walks and drives, is very delightful.

MILOT-MILLS, Your Pioneer Florists

FLOWERING SHRUBS

Add Color to the Landscape

Home grounds, whether large or small, are not inviting without the planting of ornamental shrubs. Placed about the foundation and border properly and in harmony with the house and grounds, they serve to enhance the premises and add greatly to its value.

Continuous bloom and color is more desirable than a planting of one or two varieties which bloom and then die. For your convenience we give a standard classification of location preference, height, color, time of bloom, and popular uses so that you cannot make the mistake of setting wrong shrubs in right locations or visa versa. Plant three, five, or more of a kind together for effect rather than intermingle single varieties.

The following shrubs are suitable for border and foundation planting. Sizes range from 2 to 3 feet, well branched.

ALMOND —Pink or white, double flowering, each.....	75c

HORMODIN

ROOTS PRODUCED AT WILL

Hormodin stimulates rapid root growth on cuttings at low cost.

Hormodin Powder and Hormodin Liquid are root-inducing chemicals which stimulate rapid

root growth on cuttings. Many plants formerly impossible to propagate from cuttings may now be rooted with the aid of Hormodin.

HORMODIN POWDER

Since different plants require different treatment, Hormodin Powder has been developed in three strengths.

Powder No. 1. A general-purpose powder especially good for carnations, roses, chrysanthemums, and similar types.....50c

Powder No. 2. Designed for many of the woody and semi-woody types.....75c

Powder No. 3. Designed for the more resistant species including evergreens and dormant leafless cuttings\$1.00

The treatment is simple. The moistened stems are dipped into Hormodin Powder, then placed in the usual propagating medium.

HORMODIN "A" LIQUID

The liquid form of Hormodin is applied as a dilute, water solution. It offers the possibility of treating cuttings with any desired concentration at a cost of only a fraction of a cent per cutting.

Complete directions with plant name list, and a convenient measuring vial are included in each package.

Petamine

A Complete Balanced Diet to be Fed Daily Throughout the Year. What Petamine does for Canaries: Peps them up, increases song; adds color and sheen to feathers and keeps them in fine, vigorous condition.

Restores lost song and feathers and cures many ailments when due to faulty diets.

Makes moulting easier and faster and plumage more brilliant and colorful.

Works wonders during breeding season, produces more fertile eggs, finer, sturdier young birds.

Petamine may be used as the exclusive diet or with mixed whole seeds. Recommended for all cage birds. 25c. Net weight, five ounces.

NEUTRALIZER FOR OUTDOOR POOLS

It is absolutely harmless to fish, snails or vegetation and can be used when fish are spawning, as it will not injure the fish eggs or young fish.

The powder should be poured directly into the pond in a line around the edge. About five pounds is required to clear the average small pond, 4x6 feet. If the proper amount is used the water will become clear within 24 hours. The heavy algae when it becomes loose can be removed by hand or rake. Price, 5 lbs., 50c; 10 lbs., 95c; 25 lbs., \$2.00.

Hints on Care of Goldfish

Diseases: Should the presence of white or red spots be noted on the head above the eyes or should there be a lowering of the dorsal fin, the indications are that steps should immediately be taken to combat these conditions. In most cases a change from one aquarium to another will correct the trouble. Usually, however, it is advisable to remove the sick fish and place them in a half gallon of water to which a tablespoonful of coarse salt (preferably sea salt) has been added, allowing them to remain in this solution for five or six hours when they can be returned to their original home. The treatment may be repeated two or three times after an elapse of forty-eight hours in each instance.

Write or call for pamphlet on the Care and Feeding of Baby Turtles.

How to Have a Good Lawn

Spade the ground as deep as possible and turn several times to see that it is thoroughly pulverized. Work in a good commercial fertilizer. Sheep guano or peat moss will add humus and improve the seed bed. Rake level and water thoroughly so the ground will settle. The seed bed should be allowed to stand for about two weeks, watering from time to time so the weed seeds will sprout.

Roll the ground before seeding, to prevent it from settling unevenly. and then rake the surface lightly. Sow the seed so as to cover the ground thoroughly, and then cover it lightly with soil. Roll again so as to press the seed in firmly.

FLOWER SEEDS

Including new and rare kinds and varieties which received the highest awards for the year 1940. Our stock includes special and original assortments of Bodger's, Burpee's, Vaughn's, Dreers, and Ferry-Morse flower seeds. We also put up in our own packets many varieties which we secure direct from the originators and growers in California. Should there be some special variety not in stock we will gladly order for you and save you the trouble and cost of money order.

Write us or come into our store or visit our greenhouses for such information as you may require. You are always welcome. You will be surprised when you see the many things we have, the extent of our land and greenhouses and the great variety of plants, flowers, shrubs and trees that will do well in this North Central Washington.

MILOT-MILLS LAWN GRASS SEED

Makes a beautiful velvety lawn in 40 to 60 days.

SHADY PLACE LAWN GRASS and CREEPING BENT

Sow one pound for a plot 10 by 20 ft. (200 sq. ft.)

We contract lawn work either old or new. Landscape and rock-work, tree surgery and pruning. Let us figure with you.

Work into the ground around your plants, Vigoro and Peat Moss. It is a garden need. Peat Moss by the bale or sack. Vigoro by the ounce or pound.

The home is not complete until it is surrounded by a beautiful lawn, shrubs, trees, evergreens, and flowers properly placed.

Should you not find what you want in this catalog, please make your request and we will gladly secure it for you.

Our Greenhouses and Gardens are always open to visitors and we shall consider it a pleasure to show you around.
